[Specifications](#) [Screens](#)

Welcome to Perl OS!

Perl OS is a Perl program that boots like an operating system, but runs in another operating system. The purpose of the "operating system" you run under is, naturally, the Perl.

Requirements

- Windows or Linux
- Perl version 5.6.1 or higher
- The Perl version ID number 500.001 or higher

If you do not have one or more of these, or do not know if you have them, click [here](#).

To download Perl OS, or to find out more about it, click the corresponding link in the menu above. Thank you for visiting the site.

Information on how to obtain the Perl OS
